

THE WORK INTELLIGENCE FELLOWSHIP · FOR STUDENTS

# Do real work for real companies — before you graduate.

A credit-bearing fellowship: **real enterprise experience**, frontier AI skills, a reference, and a genuine shot at a paid role.

[Apply](#)

---

THE CATCH EVERY STUDENT HITS

# Everyone wants experience. No one gives you the first chance. We do.

**The Fellowship** is that first chance — real enterprise work, on your transcript, with a reference to show for it.

---

# A fellowship where you capture real expertise

You join a small team and help a real company capture the expertise of its workforce — knowledge that's being lost as experts retire — and turn it into something that lasts. It's done as a credit-bearing capstone, supervised by your faculty.

You'll learn to do it with AI — a frontier skill almost no one your age has yet.

## The tools you'll use

Genesis — turn expert knowledge into living simulations  
FieldIQ — capture what people know on the ground  
AssessIQ — measure real competence

# Pick a track. Do work that matters.

## TRACK 01 Work Intelligence Analyst

Research an industry and its companies  
Reach out as a researcher, not a seller  
Find where critical expertise is being lost

You ship: a Work Intelligence Opportunity Map

## TRACK 02 Work Intelligence Architect

Capture an expert's knowledge with EON's tools  
Structure it into something reusable  
Hand a working result to a real company

You ship: a captured-knowledge case study

WHAT YOU WALK AWAY WITH

# Proof, not just a line on a résumé

## Real experience

Real companies, real operational problems.

## A portfolio artifact

Something tangible to show employers.

## A reference

From EON and the partner company.

## Frontier AI skills

Hands-on knowledge capture.

## A network

Mentors, companies, and ambitious peers.

## A shot at a paid role

The strongest Fellows are hired.

# A fair shot — not a guaranteed job.

We won't promise you a job, because that wouldn't be honest. Every Fellow leaves with experience, a deliverable and a reference. The strongest are invited into paid roles — earned on merit. That honesty is part of who we are.

---

# Five steps, one term

1

## Apply

A short application — drive matters more than a perfect CV.

2

## Join a cohort

Onboard with tools, playbooks and a mentor.

3

## Work a project

With a small team, on a live company challenge.

4

## Ship it

A deliverable, graded by faculty, valued by a company.

5

## Earn your reference

Leave with proof — top Fellows get hired.

# Ambition, not a perfect résumé

- ✦ Students who want real experience, not another classroom exercise
- 🎯 International students who need global enterprise experience and a reference
- ➦ Anyone curious about AI and how real work actually gets done
- ✓ No prior experience required — we'll teach you the rest

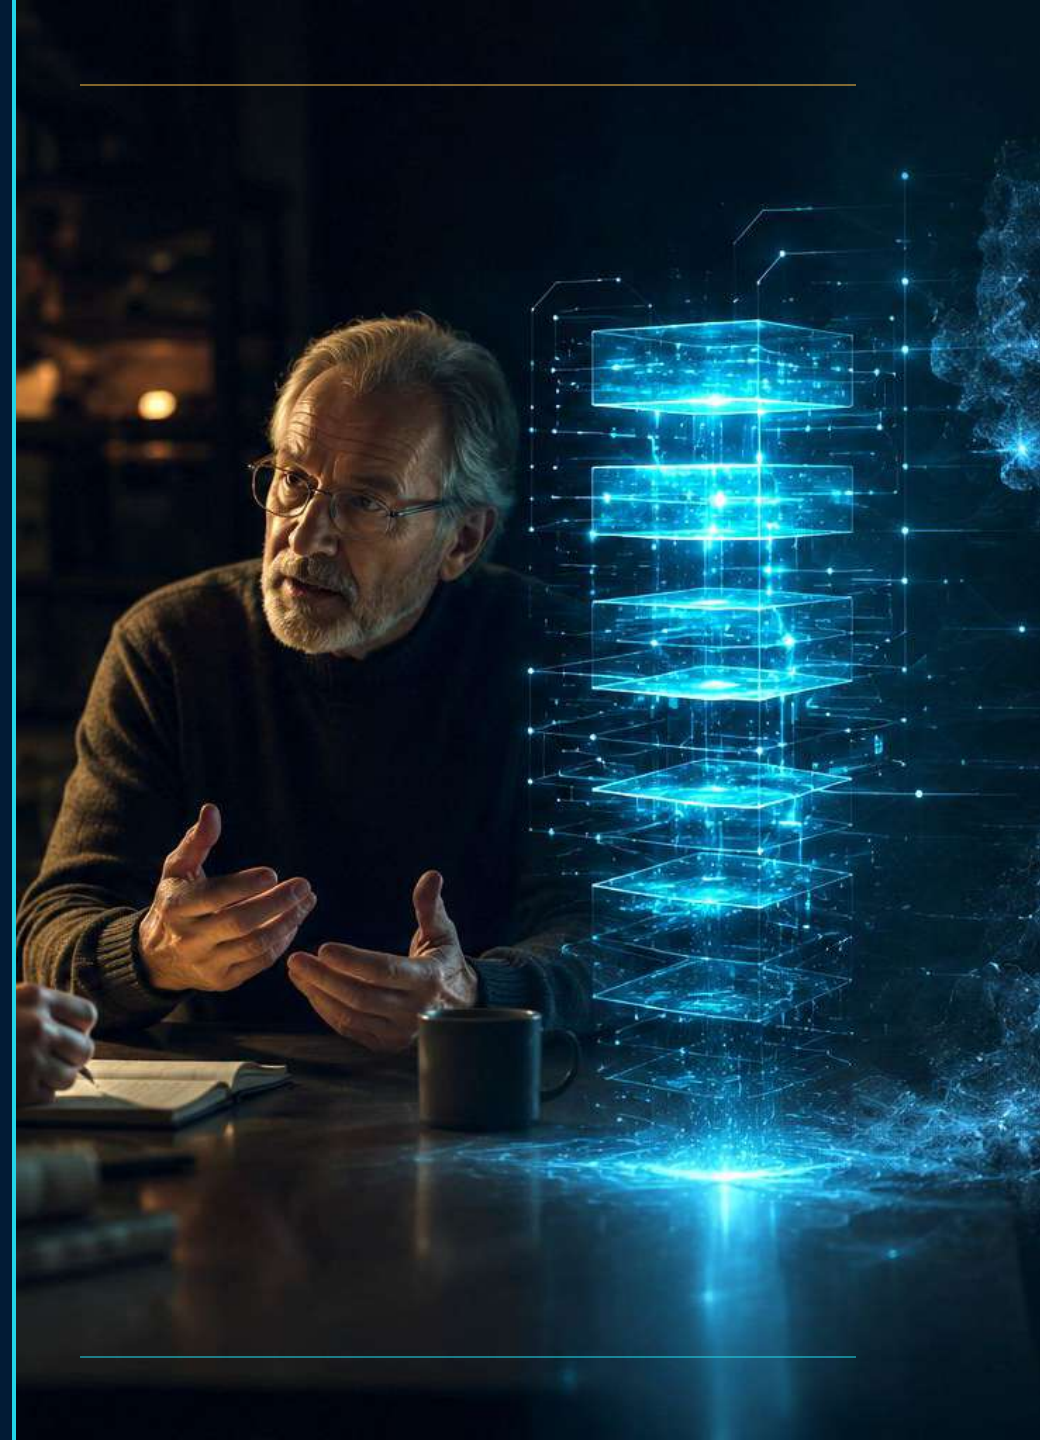

# You'll learn the skill of the next decade.

The world's hardest-won expertise lives in people — and it's being lost. As a Fellow, you learn to capture it: turning what experts know into something that lasts.

Generic AI averages the world's knowledge. You'll learn to capture the real thing.

---

# A real company behind a real opportunity

25

years

4,400+

customers

80+

countries

136M+

downloads

## A real company behind a real opportunity

A 25-year company with products in market today — not a startup experiment. The work you do here is real, and so is the company behind it.

APPLY

# Take the first chance.

Applications take a few minutes. Show us your drive — we'll show you what real work feels like.
