
A UNIVERSITY PARTNERSHIP · EON AI VENTURES

The Work Intelligence Fellowship

Give your students real enterprise experience — and the reference and career path that follow. At no cost to your institution.

Prepared for forward-thinking universities

Your students need experience you can't easily give them

International students at risk

Many fund your institution and need enterprise experience to build a career — the outcome that justifies the investment.

Employers want experience

Graduates are turned away for lack of the very experience they were never given a chance to earn.

Programs need to stand out

Differentiated, outcome-driven programs win enrollment. Capstones need real industry partners.

A frontier-technology capstone partner — at no cost to you

Real enterprise experience

Your students work with real companies on real problems.

A portfolio & a reference

Every Fellow leaves with a deliverable and a professional reference.

A path to a paid role

The strongest Fellows are hired — a genuine career on-ramp.

Zero cost

We bring the project, the platform and the mentorship structure.

A capstone where students capture enterprise expertise

The Work Intelligence Fellowship is a credit-bearing capstone in which student teams help enterprises capture the expertise of their workforce — knowledge that is increasingly lost as experts retire — and turn it into a structured, lasting asset.

Students learn a frontier skill — capturing and structuring human expertise with AI — while doing work that genuinely matters to a company.

Powered by EON Work Intelligence

Genesis — encapsulate expert knowledge
FieldIQ — capture what the workforce knows
AssessIQ — validate competence

It plugs into the capstone you already run

Credit-bearing

Structured as a graded academic capstone — not an internship, not unpaid work.

Faculty-supervised

Your faculty supervise and assess, exactly as they do today.

8–16 weeks

Fits a standard capstone or practicum term.

Student teams

Small teams, modeled on proven consulting capstones such as Westcliff's SMART program.

Your graded deliverable is a real artifact: an industry research map or a captured-knowledge asset.

Two tracks, two real deliverables

Work Intelligence Analyst

Research an industry segment
Engage companies as researchers, not sellers
Identify where expertise is being lost

Deliverable: a Work Intelligence Opportunity Map

Work Intelligence Architect

Capture an expert's knowledge with Genesis
Structure it into a reusable asset
Hand a working result to the partner company

Deliverable: a captured-knowledge artifact + case study

Experience that changes their trajectory

Real enterprise experience

Work with real companies on real operational problems.

A portfolio artifact

A tangible deliverable to show employers.

A professional reference

From EON and the partner enterprise.

Frontier AI skills

Hands-on knowledge capture with leading tools.

A fair shot at a role

The strongest Fellows are invited into paid positions.

A professional network

Relationships with mentors and enterprises.

Better outcomes, stronger programs — no cost

Placement & outcomes

Real experience and references that improve graduate outcomes — the metric that matters most.

Program differentiation

A frontier-technology capstone partner that sets your program apart in a competitive market.

A story to tell

Co-branded outcomes and case studies for recruitment and marketing.

No financial burden

No cost to the institution — EON provides the program, platform and structure.

A 25-year company, not a startup experiment

Proven products in market today

Proven products in market today — Genesis, Field IQ and Assess IQ — and an established academic capstone partnership at Westcliff University as the model for the Fellowship.

Simple to start, light to run

1

Align

A short partnership MOU and a faculty alignment on the capstone fit.

2

Cohort

Your students enroll as Fellows; we onboard them with playbooks and tools.

3

Deliver

Teams complete graded deliverables on real enterprise projects.

4

Outcomes

Students gain experience and references; top Fellows are offered roles.

Designed to protect your students and your standards

A capstone, not free labour

Credit-bearing academic work, supervised and graded by your faculty.

Honest with students

We promise experience, an artifact and a reference — never a guaranteed job.

Confidentiality handled

Enterprise engagements are governed by clear NDAs and data-handling terms.

Compliant by design

Structured as academic credit; your institution determines CPT eligibility.

PARTNER WITH US

Let's give your students a real chance.

We'd welcome a short conversation about fitting the Work Intelligence Fellowship to your program.

Anna Lejerskar · Dean of the EON Academy, EON AI Ventures
