

EON AI VENTURES

One System

The whole company in four slides.

Human 2.0

• the vision

The Intelligence Flywheel

• the engine

Work Intelligence (WI)

• the asset it produces

From vision to engine to asset

THE VISION —

Human 2.0

Every worker, multiplied. Your best expert's judgment on every shoulder — people aren't replaced, they're 10X'd.

THE ENGINE —

The Intelligence Flywheel

Genesis › Field IQ › Assess IQ › Verdict › Compound IQ — the closed loop that captures how work is really done, and compounds it.

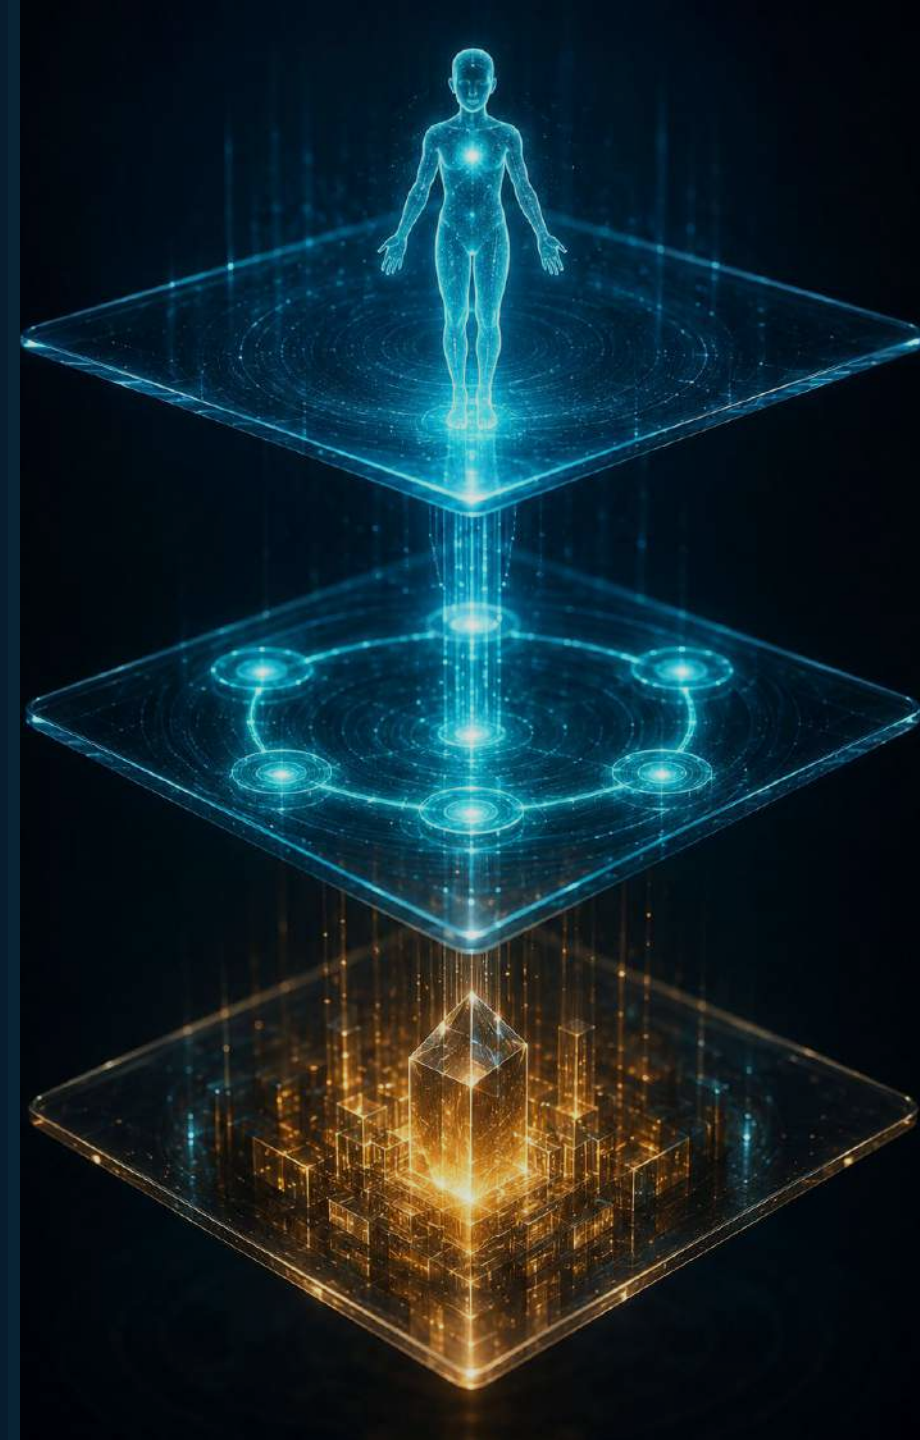

THE ASSET —

Work Intelligence (WI)

ERP for resources · CRM for customers · PLM for products · **WI for your work** — the missing system of record, owned by you.

The engine runs. The asset compounds. The people are multiplied.

Human 2.0

Every worker, multiplied.

Your best people know things they can't explain — and that expertise is retiring. Human 2.0 puts your **most experienced expert's judgment on every worker's shoulder**: guiding in the moment, verifying in the field.

Not replaced — 10X'd.

AI augments the human; the human stays in command.

The skills gap, closed.

New hires perform like veterans; veterans' know-how never leaves.

What everything else serves.

The engine and the asset exist to deliver this.

The Intelligence Flywheel

The closed loop that captures how work is really done — and compounds it.

Four breakthroughs had to converge — only EON holds all four, as one closed loop.

Work Intelligence

The asset the flywheel produces — and you own.

Business Intelligence told you what your company did. Work **Intelligence captures how your company actually works** — held in a living **3D world, not in words**. ERP holds your resources, CRM your customers, PLM your products. **WI holds your work**.

Owned by you, not a model vendor.

Your Work Intelligence **stays your asset** — and **compounds daily**.

The previously-uncapturable ~90%.

The **most valuable slice** of intangible value, **finally on the record**.

The curriculum machines will need.

Machines get Physical AI. **Your enterprise gets Work Intelligence.**
