

Situation Room Creator

A company's own learning and training library

Product status and completion plan

27 September 2026

Public demonstration available now

What we have built

The main creation and learner journey works

- 01 Company library and six authoring steps
- 02 Saved preparation, named review and publication
- 03 Five interactive synthetic activities and a demo certificate
- 04 A public Vercel link that visitors can try

What we are doing now

Making the product easy to explain and try

- 01 Updating the question-mark introduction
- 02 Adding a detailed user guide with company use cases
- 03 Checking the hosted creation path through publication
- 04 Preparing a factual preview press release

Practical company uses

One library for several kinds of learning

- 01 Near misses: preserve and practise lessons from work
- 02 SOP changes: explain the latest approved procedure
- 03 Equipment: identify parts before practical training
- 04 Onboarding: give new employees a clear starting place

Completion estimate

About 50% of the full production outcome

- 01 The fixed demo works from creation to sample certificate
- 02 This is a judgement estimate, not a count of passing tests
- 03 Synthetic activities do not establish live integration
- 04 Customer operation and cutover remain ahead

What remains to finish

The production connections and release work

- 01 Connect materials, Brainy/avatar, MCQ, oral and Infinite
- 02 Bind real identities, course editions, results and certificates
- 03 Complete Control delivery, hosting, storage and recovery
- 04 Pilot with approved content, then migrate and release

The next complete course

One real path will unlock the wider rollout

- 01 Use one approved course and the existing engines
- 02 Review generated content and launch each real activity
- 03 Return results to the correct learner and course edition
- 04 Check failures and retries before a company pilot

Try the demonstration

A clear first visit

- 01 Open the public link and select Sam Morgan · learner
- 02 Open Inside a jet engine · five-activity demo
- 03 Choose Try synthetic demo activities
- 04 Use ? 1-minute guide for instructions and the full manual
